Clause 3 - Documentation and file completeness

3.1 The credit file must contain the sanction memorandum, the technical valuation report, the bureau report, the deviation register and the KYC annexure before a credit decision is recorded.

3.2 A file missing any document listed in 3.1 is returned to the branch and is not reviewed until the document is placed on file.

3.3 No document may be altered after intake. Every document is hashed at receipt and the hash is retained with the file. A document whose hash no longer agrees with the intake record is treated as unreliable, and every conclusion drawn from it is withdrawn pending explanation.

3.4 The bank statement is a record, not a claim: balances and summaries printed on it are checked against the transactions on the same statement.

Clause 4 - Bureau and conduct

4.1 A bureau score below 700 at the date of sanction requires the file to be declined, or escalated to the Credit Head with the reasons recorded.

4.2 An account with 30 or more days past due in the trailing twelve months is not eligible under this policy.

4.3 The bureau report relied upon must be no older than 30 days at the date of sanction. A report older than 30 days is not a valid basis for the decision.

4.4 Bureau findings are recorded against the report on file, with the report date and the score stated in the review memorandum.

Clause 5 - Income and FOIR

5.1 FOIR is the contractual instalment on the proposed facility plus all existing monthly obligations, divided by verified net monthly income.

5.2 FOIR shall not exceed 55% of verified net monthly income.

5.3 Verified net monthly income is the average of the salary credits evidenced in the bank statement over the statement period.

5.4 Income stated in the sanction memorandum must reconcile to the verified figure within 10%.

5.5 Co-applicant income may be counted only where it is independently evidenced by a statement on file; otherwise it is excluded from the ratio and the exclusion is recorded in the note.

Clause 6 - Security and LTV

6.1 LTV is computed on the value stated in the technical valuation report, and not on the consideration stated in the agreement to sell.

6.2 LTV shall not exceed 90% where the loan is up to Rs. 30 lakh, 80% where the loan is above Rs. 30 lakh and up to Rs. 75 lakh, and 75% where the loan is above Rs. 75 lakh.

6.3 The value adopted in the sanction memorandum must agree with the technical valuation report within 2%.

6.4 A valuation relied upon for LTV purposes must be dated within 90 days of the sanction date.

Clause 7 - Accuracy and identity

7.1 Every ratio stated in the sanction memorandum must reproduce from the inputs stated in the same memorandum.
7.2 The name on the PAN must match the name on the Aadhaar. A difference is acceptable only where the supporting instrument of change is on file.
7.3 Post-disbursement documents listed in the annexure must be received within 90 days of disbursement; until received, the file remains open.

Clause 8 - Deviations

8.1 Any breach of the FOIR cap in 5.2 or the LTV cap in 6.2 requires a deviation approved at L2, registered against the same loan, with a stated validity date.
8.2 A deviation that has lapsed, is registered against another file, or is approved below L2 provides no cover for the breach. The breach is reported on its merits and the deviation is reported alongside it.
8.3 A deviation does not convert a breach into a pass. It converts a breach into an explained breach, which a named person signs off with the evidence.
